Excelerate Group are the trusted providers of Critical Data, Video, Voice and Internet via Satellite, LTE (4G) and Wireless Solutions to the Emergency Services, Government Organisations, National Infrastructure and More

Full time experts from local office in South of France with the backup and security of a global company with offices in the UK, UAE, Australia and France.

ABOUT EXCELERATE - WHAT MAKES US DIFFERENT?

As the leading and trusted critical communications provider to Government and the Emergency Services, failure to deliver is not an option in our world.

With our total commitment and attitude to ensuring continuous value and support our maritime customers are never left without the ability to communicate whether it be for leisure, business, entertainment or to support you in life threatening safety or security situations.

Formed in 2001, we pioneered the concept of rapidly deployable, totally independent and resilient broadband via satellite for emergency responders, which now supports a broad range of applications. The solutions which we provide are customised to user needs, simple to operate and developed and supported by our in-house R&D and engineering teams.

We have now extended our experience and expertise into the Maritime market where no other provider has these end to end credentials.

BUILDING THE BEST VALUE SOLUTION AROUND YOUR NEEDS

We acknowledge that one size doesn't fit all, so we offer a combination of communication bearers all designed to work seamlessly together tailored to your requirements. These include **VSAT, Ku or Ka Band (or both), L Band, GSM/3G/4G** and even **VHF/UHF**. By utilising multiple communication bearers, we are able to deliver better value for your communications wherever your yacht is sailing or moored.

CONNECTIVITY AND DATA USAGE MANAGEMENT MADE SIMPLE

We make it easy for owners, captains and crew to use and control broadband usage. Our Digital Dashboard Maritime Interface (DDMI) has been designed for ease of use for non IT experts.

DDMI combines all of your connectivity information into a single user interface for simple management including bearer status and availability, user prioritisation, VSAT status & line of sight information and more.

A DIFFERENT APPROACH TO BROADBAND ON BOARD

Our aim is to deliver the best value solution possible to meet our customers requirement and budget. This is no different to the service we provide to our Emergency Services customers - many of which have been long-term partners for many years.

The word **cheap** doesn't appear to exist with premium brand products but nor should it necessarily imply that it should be the most expensive - the compromise is called **value** and that is what we aim to provide - **value for money**. How cheap a product or solution is becomes irrelevant if it doesn't work, is unreliable, is impossibly difficult to use or fails to get immediate support when support is needed.

Our absolute priority - it MUST work, it MUST meet your requirements and it MUST satisfy your right to enjoy value for money.

EDDIE JORDAN'S SUNSEEKER FLAGSHIP YACHT "BLUSH" ENJOYS A THIRD PERFECT PERFORMANCE SEASON ON EXCELERATE'S ENHANCED COVERAGE SATELLITE NETWORK

Market leaders in the provision of data, video, voice and Internet via satellite and wireless solutions, Excelerate Group implements its best in class satellite broadband service aboard the Super Yacht 'Blush', which is owned by Eddie Jordan's family trust.

Proof that reputation and word of mouth is the most powerful form of marketing has been no better evidenced than when Sean Read, former Captain of the 155ft Super Yacht 'Blush', began looking for a better and more reliable Satellite Broadband service for the yacht.

As well as cost effectiveness and usability, Sean's aim was to find a solution that could handle a broad range of applications aboard Blush, meeting the needs of the owner, the crew and guests alike, with the yacht being frequently chartered out.

"The equipment was new at the time of installation and has caused no problems. The connection is reliable and speeds are as good as I have experienced in the VSat era and the technical support, on the rare occasion it is needed, is quick, concise and immediate. The service provided has been of the highest quality in every way.

Matthew G. Callaway
 Captain of Sunseeker 155 MY Blush

MY PRINCESS AVK CHOOSE EXCELERATE FOR ENHANCED COMMUNICATIONS ONBOARD

The 155 foot Sunseeker flagship yacht 'MY Princess AVK' has recently upgraded its communications systems onto Excelerate's new enhanced coverage KU network and also its new KA network making it Excelerate's first dual KU/KA customer.

- talk to numerous happy captains whose lives have been made easier since they became Exceleerate customers

“ SYM Superyacht Management had been picking up great reports about Exceleerate's Satellite Broadband Service and when one of our client yachts, the 46 Metre Benetti Wild Orchid 1 were looking for a new provider urgently. We put the two together and in no time at all Wild Orchid 1 were up and running and I am happy to report that the yacht, it's owners and its crew have had a great season with Exceleerate with one less thing for a busy captain or us to worry about

Ben Young - Managing Director of Cannes based SYM Superyacht Management
